

## Teaching and Learning Experience Sharing (TALES) Workshop

This workshop is co-organized by the Centre for Holistic Teaching and Learning and the Office of Student Affairs

# Supporting Learners with Physical Disability

### ③ Date

**16 April 2018  
(Monday)**

### ③ Time

**12:45 – 2:15 p.m.**  
*(light lunch from 12:30 – 12:45 p.m.)*

### ③ Venue

**WLB 109**  
*Dr. Wu Yee Sun Lecture Theatre,  
Lam Woo International  
Conference Centre, Shaw campus*

### ③ Abstract

Education in Hong Kong is considered competitive and demanding in academic performance for most students. To those with special educational needs due to disability or other medical conditions, learning can be especially challenging. They require more school support and special accommodations, not only to overcome learning barriers but also to enhance their confidence, interest and potential in learning. Occupational therapists will provide standardized assessments to evaluate functional performance and environmental issues so as to recommend appropriate learning accommodations and support for learners with special needs. In this seminar, common types of physical disability and impairments that cause obstacles in learning will be discussed. Special arrangements and environmental modification to support and facilitate more independence in learning tasks and academic assessments for learners with physical disability will be highlighted.

### ③ Facilitator

**Mr. NG Chun Kwok, Marcus**

*Senior Lecturer  
Occupational Therapy, School of Medical and Health Sciences,  
Tung Wah College*

### ③ Biography

Mr. Ng Chun Kwok, Marcus is currently a Senior Lecturer in Occupational Therapy, School of Medical and Health Sciences of Tung Wah College. He has extensive clinical experience in Hong Kong and Australia in the provision of Occupational Therapy (OT) services for children and young adults with physical disability in school and community settings. He has devoted himself to expand the scope of OT services to meet new challenges and demands on supporting students with special educational needs in learning and daily living activities. In recent years, Marcus has been involved in research projects on assessment of handwriting speed and special examination arrangements for students with physical disability in public examinations. He has been invited by former Hong Kong Institute of Education, Hong Kong Occupational Therapy Association, Education Bureau and local universities to share his expertise in this specialized area with therapists, teachers and others professionals.
