Teaching Development and Language Enhancement Symposium
cum Book Launch

📅 Monday, 28 August 2017
9:30 a.m. - 4:00 p.m.

📍 WLB 210, 2/F, The Wing Lung Bank Building for Business Studies, Shaw Campus, Hong Kong Baptist University

Over the years, the Teaching Development Grant (TDG) and the Language Enhancement Grant (LEG) have been supporting many successful projects/initiatives, with their findings and deliverables widely disseminated and adopted in the UGC sector. This Symposium seeks to showcase the good work of our colleagues who have benefited from the teaching and learning related funds from the UGC, amidst facilitating discussion on innovative pedagogies and collaboration between teaching development and language enhancement.

KEYNOTE: **Collaborative Problem Solving via Challenge Based Learning**

Professor David Gibson

UNESCO Chair of Data Science in Higher Education Learning and Teaching
*Director of Learning Futures at Curtin University*

ABSTRACT:

The context of Curtin University, where the Square Kilometer Array world project is building the world's largest telescope, has given rise to the development of a supercomputer capable of analyzing a torrent of astronomical data. This in turn, has attracted computational scientists from all over the world to assemble, collaborate and develop capacities for other benefits of the high-performance computing platform. The UNESCO Chair of Data Science in Higher Education Learning and Teaching at Curtin University exists to leverage this context to improve access to and effectiveness of higher education worldwide. This is the context in which a new platform has been developed to facilitate collaborative problem solving in challenge-based learning. This talk will outline its features by describing challenge-based learning as a serious game, the design and analytics foundations of assessment in a new model of 'Personal Learning + Collaboration + Problem Solving' framework, and will conclude with remarks about educational data science design and processes, including the challenge of developing staff team capacity in higher education.
